

ALBERT BRAUN

FRONT-END DEVELOPER | REACT & TYPESCRIPT

PROFESSIONAL SUMMARY

Front-End Developer focused on React and TypeScript, building responsive web applications from Figma designs. Experienced with state management, form validation and modern frontend tooling, with hands-on projects ranging from e-commerce applications to responsive marketing websites.

EXPERIENCE

Independent Front-End Developer 2024 — Present
Project-based development | Alicante, Spain / Remote

- Built and delivered responsive web applications and landing pages from Figma designs using React, TypeScript and modern CSS.
- Developed e-commerce functionality including product catalogs, search/filtering, shopping carts, wishlists and form validation.
- Managed application state using Redux Toolkit and Zustand and implemented validated forms with React Hook Form and Zod.
- Maintained projects through Git/GitHub workflows including feature branches and pull requests.

PROJECTS

FASCO Store — E-commerce Application

Built a responsive e-commerce interface with product filtering, cart and wishlist functionality. Implemented global state with Zustand and validated forms using React Hook Form and Zod.

React, TypeScript, Zustand, React Hook Form, Zod

<https://albert-braun.github.io/Online-clothing-store/>

Web Shop — Computer storefront

Built a product catalogue with search, sort and a shopping cart. Persisted cart state between sessions with localStorage.

React, JavaScript, CSS
